SUMMARY

ISTQB-certified QA Automation Engineer / SDET with nearly 5 years of experience in UI, REST API, integration, mobile, and end-to-end testing. Hands-on with Playwright Test using TypeScript, WebDriverIO using JavaScript, Pytest using Python, and ReadyAPI / SoapUI Pro using Groovy, plus Postman, SQL, Jenkins, and GitLab CI/CD. Contributed to a six-member team maintaining 200+ automated UI, API, and E2E scenarios, directly developed and maintained 100+ critical workflows, and supported quality validation across 20+ production releases for ID Check, RecovR, Sentinel, and Billing Portal.

TECHNICAL SKILLS & CERTIFICATIONS

- **UI & E2E Automation:** Playwright Test with TypeScript, WebDriverIO with JavaScript, Pytest with Python, Page Object Model (POM), Fixtures, Resilient Locators, Assertions, Cross-Browser Testing
- **API & Integration:** REST API automation, ReadyAPI / SoapUI Pro with Groovy, Postman, Integration Testing, Test-Data and Backend Validation
- **Programming & Data:** TypeScript, JavaScript, Python, Groovy, SQL, YAML
- **CI/CD & Test Tools:** Jenkins, GitLab CI/CD, Docker, Git, GitHub Actions
- **Test Management:** Jira, QMetry, Xray, Allure Reporting, Defect Triage, Test Planning and Release Reporting
- **Additional Automation Tools:** Selenium, Appium, TestProject, TestSigma, Protractor, MCP
- **QA Practices:** Test Strategy/Planning, Regression, Smoke, Sanity, System, Exploratory, Defect triage, Agile/Scrum, SDLC/STLC

WORK EXPERIENCE

NAGRAVISION India Pvt Ltd, Kudelski Group | Bengaluru, Karnataka
Software Engineer Tier-1 (Feb 2023–Present) | Associate Engineer (Jul 2022–Jan 2023) |
Trainee Engineer (Sep 2021–Jun 2022)

- Built and maintained UI, REST API, integration, and E2E automation for ID Check, RecovR, Sentinel, and Billing Portal using WebDriverIO with JavaScript, Pytest with Python, ReadyAPI with Groovy, and Postman.
- Contributed to a six-member automation team maintaining 200+ automated UI, API, and E2E scenarios, directly developed and maintained 100+ high priority workflows using reusable Page Object Model components and utilities.
- Established the initial E2E automation foundation in Git and integrated scheduled daily / nightly execution with Jenkins and GitLab CI/CD, investigated failures and stabilized suites across stubbed and real-service environments.
- Automated REST API and integration scenarios with ReadyAPI / SoapUI Pro, Postman, and Groovy, performed test-data and SQL-based backend validation and triaged failed nightly executions.
- Served as the primary QA SME for ID Check and supported Billing Portal validation, owning test strategy, test planning, production-like test data, exploratory / regression execution, defect triage, and release readiness reporting across 20+ production releases.
- Uncovered a critical identity-verification workflow gap through exploratory testing and coordinated resolution with development, SRE, operations, product, and global business teams to protect release quality.
- Built Playwright Test with TypeScript POCs for modern UI automation using role-based locators, assertions, Page Object Model, reusable fixtures, and cross-browser execution, evaluated TestSigma and MCP-based self-healing automation.
- Executed smoke, sanity, system, integration, cross-browser, exploratory, and release validation; managed test traceability and defects in Jira, QMetry, and Xray, with execution reporting through Allure.

EDUCATION & CERTIFICATIONS

- **Education:** Bachelor of Engineering, Electronics and Communication Engineering — July 2014 - June 2018
  - Atria Institute of Technology, Bengaluru
- **Certifications**: ISTQB Certified Tester – Foundation Level (2025)
  - WebDriverIO + Node.js – JavaScript UI Automation - Certificate of Completion
  - TestFlix – Certificate of Participation
